

Introduction

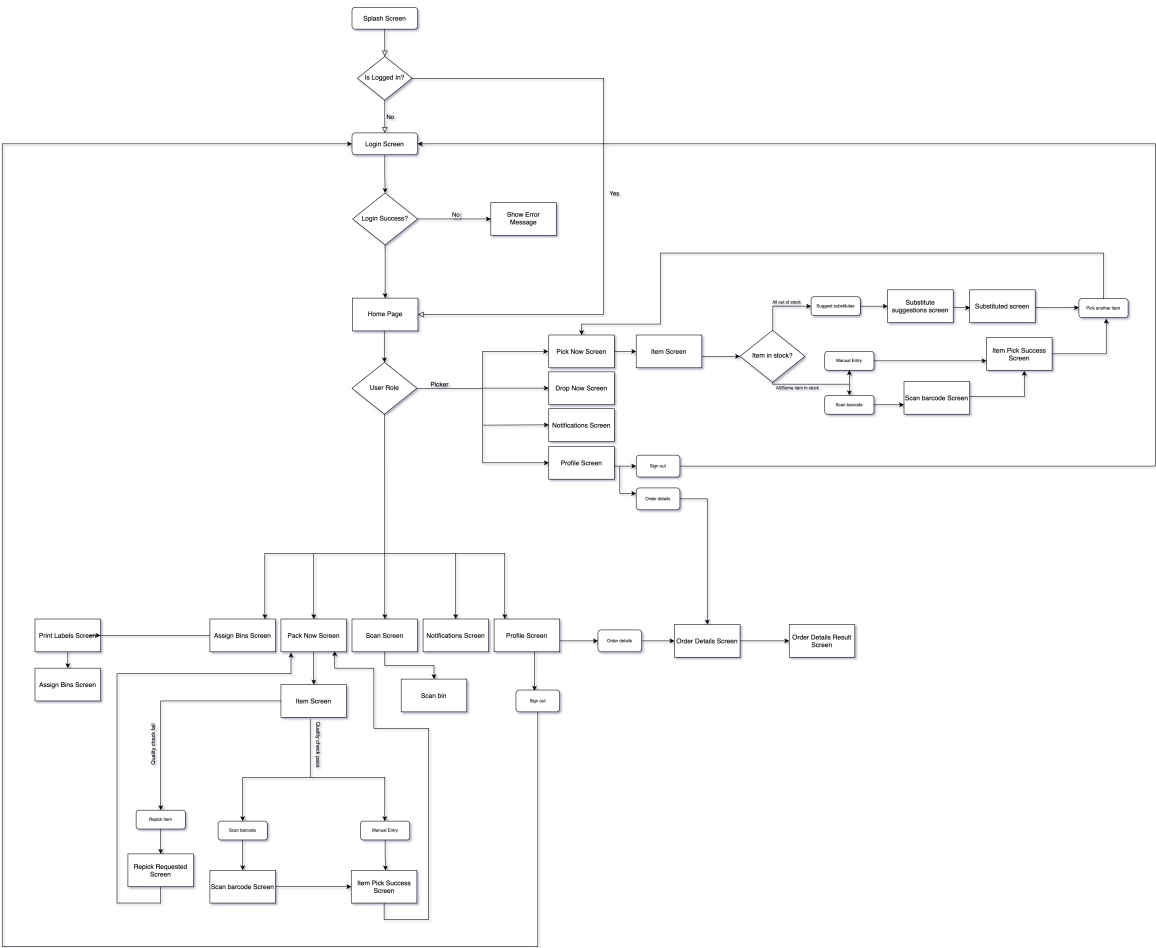

Nesto's Pick and Pack is app serves the roles of picking and packing as part of order fulfillment process. The app supports 2 user roles respectively:

- Picker: responsible for picking the order items
- Packer: responsible for packing the order

Basic workflow

The basic workflow is explained [here](#).

Workflow diagram

Git branches

master

The current tip-of-tree, has all the features. Tested and stable. production released are tagged

LegacyCamera [DEPRECATED]

For legacy devices using camera for scanning. This branch is NOT up to date with latest features and is considered legacy since Zebra devices are being used for order fulfillment.

*For new developers, it is recommended to start a new **feature** branch based of **master** and work on it.*

Technologies Used
